

Butterfly Life Cycle

Students will learn about a butterfly's stages of development while making a 3D diagram.

K - 2nd
Grade

Materials

- Markers/ Crayons
- Ditalini pasta
- Egg noodles
- Mini shells pasta
- Farfalle pasta
- Glue
- Paper plate or blank paper

Directions

Print or draw the template provided. Glue the ditalini pasta in the "Eggs" section. Glue the egg noodles in the "Caterpillar" section. Glue the mini shells in the "Chrysalis" section. Glue the farfalle pasta in the "Butterfly section". Color in the different life stages.

Fun Facts

1. Butterflies make chrysalis, but moths make cocoons.
2. Monarch butterflies can migrate up to 3,000 miles!
3. It takes about one month for the eggs to completely turn into butterflies.
