

Oreo

Moon Phases

K - 2nd
Grade

Materials

-  Oreo cookies
-  Spoon
-  Moon phases worksheet

Click the moon below to access the worksheet.

Students will learn about the phases of the moon and make models using Oreo cookies.

Directions

1. Open the moon phases worksheet and print it out.
2. Take out 8 oreos and place them in front of you.
3. Slowly twist each of them to separate the two side. By doing this slowly, you can maximize how much frosting you have left on one of them.
4. Using your spoon, scrape away some of the frosting to recreate the different moon phases (see picture below). The remaining frosting will represent the sun light we see reflecting off of the moon during each phase.
5. Arrange the moon phases in their correct places on the worksheet.
6. Take a picture and then eat all of the cookies!
